## SUMMARY

I am Technical Engineer of Computer Engineering specialty that gave-up his engineering background for sales career. Still not convinced if it was a mistake. With more than 20 years of experience in the area of sales management, working for best SI/IT/SMARTPHONE players on the market, I recently decided to "return to the roots" and complete Red Team Specialist course for Cyber Security professionals (to the courtesy of HackerU/University of Warsaw). It is obvious how sales, especially ever increasing online sales, is closely connected with Cyber Security threats nowadays and it is only a tip of the iceberg called Cyber Security. Personally, I find it very exciting. I am open to positions in Cyber Security field that will harness my sales expertise and/or let me continue to specialize/job profile in Cyber Security field (SIEM solutions, Red Teaming, Pen Testing, Mobile Security, etc.). I am a result oriented, communicative, analytical approach individual. In all my work environments I always tried to bring a dose of humor because I believe it eases the negative effects of operating under stress for a long time.
